

Website Developer Proposal

05.10.2023

Isaac M Brown

Overview

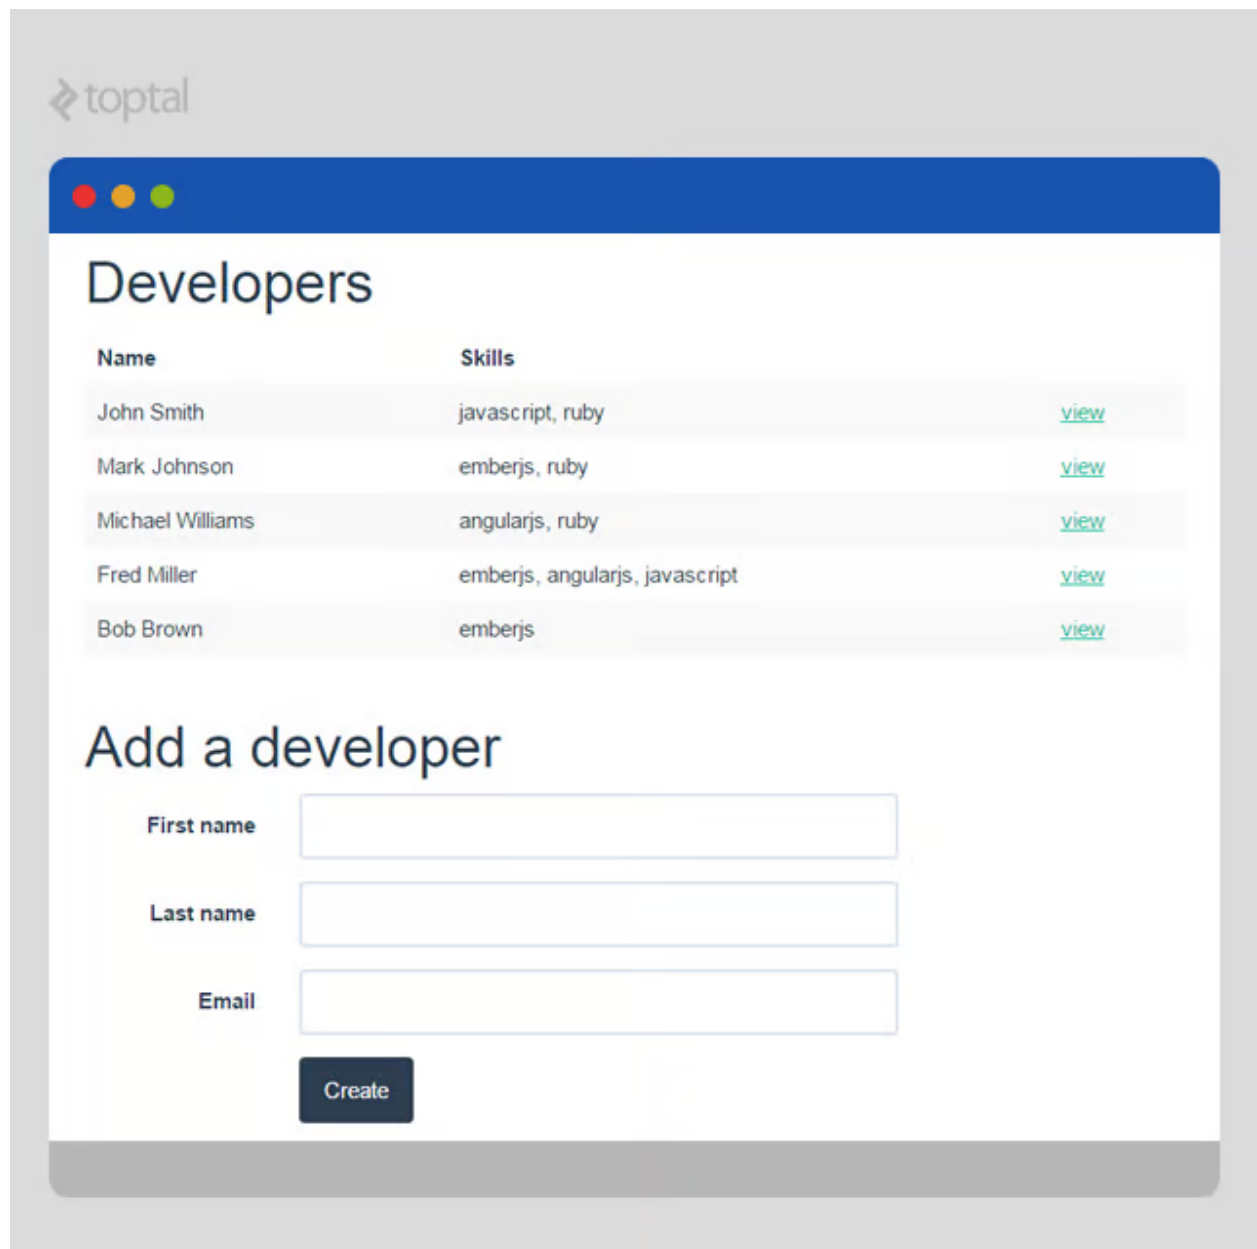

This project was done not only to further develop websites for new companies and independent industries of other organizations and businesses but also to find new ways to develop websites by finding new developers in the world.

Goals

1. Further, develop websites for a multitude of companies and businesses.
2. Find new ways in order to develop websites by finding new developers in the world.

Specifications

Image of the website:

The screenshot shows a web application interface for managing developers. At the top left is the 'toptal' logo. Below it is a blue header bar with three colored circles (red, yellow, green). The main content area is titled 'Developers' and contains a table with two columns: 'Name' and 'Skills'. The table lists five developers: John Smith (javascript, ruby), Mark Johnson (emberjs, ruby), Michael Williams (angularjs, ruby), Fred Miller (emberjs, angularjs, javascript), and Bob Brown (emberjs). Each row has a 'view' link. Below the table is a section titled 'Add a developer' with three input fields for 'First name', 'Last name', and 'Email', and a 'Create' button.
